

Electronics Technician / Mechatronics Technician (m/f/d) for Manufacturing & Product Testing

Originally emerging from a research project, indurad has been developing innovative sensor solutions for the global leading raw materials industry since 2008. From our headquarters in Aachen, our team of 150 fantastic employees ensures that our high-quality solutions lead to more safety and reduced greenhouse emissions in the bulk and raw materials industry around the world.

indurad combines the dynamics of a start-up with the energy and ideas of a large corporation – that's what makes us unique! We are a diverse team of talented, innovation-driven individuals focused on making a positive impact on a large scale.

But there's still something missing – and that's you!

We are looking for an **electronics technician / mechatronics technician (m/f/d)** to join our Supply Chain team at our headquarters in Aachen.

What can you expect?

- You are responsible for the functional testing of our finished products, checking the communication between our hardware components and the associated software.
- You document the final results in accordance with our quality system.
- You support our manufacturing team in producing in-house prototypes and small-series products, as well as related semi-finished products, and you also conduct quality inspections here.
- You take care of troubleshooting, perform fault analyses, and actively participate in the continuous improvement process (CIP).
- You document and process the manufacturing processes according to the ISO9001 standard in the ERP system (Odo).

What should you bring?

- Ideally, you have completed training as an electronics technician (preferably in the field of "Devices and Systems") or as a mechatronics technician.
- Alternatively, you have gained experience in the software field, network technology, and electronics through other means, such as a degree in electrical engineering.
- Our high-quality sensor technology excites you just as much as it excites us: You have a passion for technical topics and a strong affinity for technology.
- Teamwork and independent work are among your strengths.

- What's important to us is the ability to quickly familiarize yourself with new areas and your ability to work in a focused and precise manner.

What do we offer you?

- An attractive salary package is a given. Additionally, you will benefit from various allowances, such as a company pension plan, business bike, or a subsidy for your job ticket.
- 30 days of vacation and up to five additional days off through flexible working hours.
- Whether you're an early bird or a night owl – thanks to flexible working models (flextime), you can design your workday to suit you.
- With us, you can expect a diverse and challenging range of tasks in an international project environment.
- Family time is especially important to us, and we live that every day: In addition to our family-friendly working hours, we cover the childcare costs for your child/children – whether it's a kindergarten, daycare, or family care.
- We offer you a workplace with a feel-good factor: bright, modern spaces, innovative tools, ergonomic equipment, drinks and snacks, free parking, and plenty of room for initiative and personal development – all of this is important to us so that you feel completely comfortable!
- Direct access to management and supervisors, open communication, a valued team atmosphere, and a relaxed dress code are just as important to us as a lived "you" culture.

Perfect Match?

We want to make it easy for you!

Our recruiting expert Bianca Just looks forward to receiving your resume (max. 5 MB) with your salary expectations and desired start date via email at job@indurad.com or through direct application via our application form.
