

## Employee in International Shipping & Logistics (m/f/d)

Originally emerging from a research project, indurad has been developing innovative sensor solutions for the global leading raw materials industry since 2008. From our headquarters in Aachen, our team of 150 fantastic employees ensures that our high-quality solutions lead to more safety and reduced greenhouse emissions in the bulk and raw materials industry around the world.

indurad combines the dynamics of a start-up with the energy and ideas of a large corporation – that's what makes us unique! We are a diverse team of talented, innovation-driven individuals focused on making a positive impact on a large scale.

### But there's still something missing – and that's you!

We are looking for an **employee in the area of international shipping & logistics (m/f/d)** to join our Supply Chain team at our headquarters in Aachen.

### What can you expect?

- You will be responsible for the shipping area: from packaging our mostly international shipments, creating customs documents, to coordinating schedules.
- You will be the perfect interface between customers, logistics partners, customs, and ensure smooth operations.
- You will have our products in your hands last, making your visual inspection of the products a central part of our quality assurance.
- You will keep track of the shipping metrics and quality statistics and assist colleagues in the internal warehouse.
- Additionally, you will be involved in the continuous optimization and review of processes and contribute to our continuous improvement process (KVP)

### What should you bring?

- Our must-have: You enjoy a job that goes beyond the traditional shipping role and requires initiative and attention to detail.
- Ideally, you have completed a commercial apprenticeship (e.g., as a logistics specialist) or a similar qualification, even if you're just starting out.
- Alternatively, we also welcome career changers or individuals who have already gained some experience in international shipping and customs.
- Our high-quality sensor technology not only excites us but also you: You enjoy technical topics and have the ability to dive into new areas.
- You are comfortable working with common MS Office programs and have ideally worked with an ERP system.
- You feel at home in an international environment: You have good English skills and are not afraid to use them.

## What do we offer you?

- An attractive salary package is a given. Additionally, you will benefit from various allowances, such as a company pension plan, business bike, or a subsidy for your job ticket.
- 30 days of vacation and up to five additional days off through flexible working hours.
- Whether you're an early bird or a night owl – thanks to flexible working models (flextime), you can design your workday to suit you.
- With us, you can expect a diverse and challenging range of tasks in an international project environment.
- Family time is especially important to us, and we live that every day: In addition to our family-friendly working hours, we cover the childcare costs for your child/children – whether it's a kindergarten, daycare, or family care.
- We offer you a workplace with a feel-good factor: bright, modern spaces, innovative tools, ergonomic equipment, drinks and snacks, free parking, and plenty of room for initiative and personal development – all of this is important to us so that you feel completely comfortable!
- Direct access to management and supervisors, open communication, a valued team atmosphere, and a relaxed dress code are just as important to us as a lived "you" culture.

## Perfect Match?

We want to make it easy for you!

Our recruiting expert Bianca Just looks forward to receiving your resume (max. 5 MB) with your salary expectations and desired start date via email at [job@indurad.com](mailto:job@indurad.com) or through direct application via our application form.
