

Working student (f|m|d) – Software (Android)

Our Passion - Be a part of it!

Originally as a research project, indurad has been developing innovative sensor solutions for the world's leading raw materials industry since 2008. From our headquarters in Aachen, our team of 150 fantastic employees ensures that our high-quality solutions lead to greater safety and lower greenhouse emissions in the bulk solids and raw materials industry around the globe. indurad combines the dynamism of a start-up with the energy and ideas of a large corporation - that's what makes us so unique! We are a diverse team of talented, innovative people focused on making positive change happen on a large scale.

But one thing is missing – and that's you!

We are looking for a **working student with a focus on Android (f|m|d)** to support our software team at our headquarter in Aachen as soon as possible.

What to expect

- You will develop and maintain modern Android apps that support our customers in their daily processes in the raw materials industry.
- You will work on customer visualizations, dashboards, and mobile frontends that present complex process data in a clear and understandable way.
- Intuitive UI/UX concepts, high-performance implementations, and clean code architectures will be part of your daily work.
- UI and functional testing as well as ensuring overall app quality will become your area of expertise.
- You will contribute your ideas to improving user experience, app performance, and our overall mobile product strategy.

What should you bring

- You are studying computer science, electrical engineering, or a comparable scientific/technical field.
- Through internships or initial private projects, you have already gained solid knowledge in the following areas: Android Studio, Android debugging tools (e.g., adb), the Kotlin programming language, and the Gradle build system (Kotlin/Groovy plugins) for Android apps and/or the Android Compose framework for building modern user interfaces.
- You have a basic understanding of the Android development process, e.g., app architecture, activities, services, intents, broadcast receivers, and permission models.
- Ideally, you also bring knowledge of Java.
- You are characterized by a high degree of independence, initiative, and team spirit.
- You feel comfortable in an international environment: you have good German and English skills and are confident using them.

What we offer you

- Early riser or night owl - Thanks to home office and flexible working time models you can organise your working day yourself
- You will become part of our team and receive direct and professionally sound training and support
- We offer you a workplace with a feel-good factor: bright, modern premises, ergonomic equipment, drinks, free parking and enough space for your own initiative and development opportunities - all this is important to us so that you feel completely at ease!
- Direct lines to management and superiors, open communication, respectful interaction and a relaxed dress code are just as important to us as a lively "you" culture

Perfect Match?

We want it to be uncomplicated for you! Our recruiting expert Bianca Just looks forward to receiving your CV (max. 5 MB), including your salary expectations and preferred starting date, by email at job@indurad.com or via **direct application** through our application form.
