

DevOps Engineer (f|m|d)

Software-Update & Monitoring Infrastructure

Our Passion - Be a part of it!

Originally emerging from a research project, indurad has been developing innovative sensor solutions for the global leading raw materials industry since 2008. From our headquarters in Aachen, our team of 150 fantastic employees ensures that our high-quality solutions lead to more safety and reduced greenhouse emissions in the bulk and raw materials industry around the world.

indurad combines the dynamics of a start-up with the energy and ideas of a large corporation – that's what makes us unique! We are a diverse team of talented, innovation-driven individuals focused on making a positive impact on a large scale.

But there's still something missing – and that's you!

We are looking for a **DevOps Engineer (f|m|d) Software-Update & Monitoring Infrastructure** to join our software team at our headquarters in Aachen as soon as possible.

What can you expect?

- You will provide and maintain our internal infrastructure to monitor our diverse fleet of devices.
- You will develop, optimize, and document GitLab CI pipelines for both internal and external projects.
- With your expertise, you will continuously drive the further development and maintenance of our self-hosted build server infrastructure.
- In addition, you will contribute to the advancement of other self-hosted DevOps services and define a roadmap and architecture aligned with modern CI/CD principles – including the integration of our specialized hardware deployed in the field.
- You will design and develop user interfaces that enable our developers to manage and control devices in the field, continuously improving usability and user experience.

What should you bring?

- A degree in Computer Science, completed vocational training as an IT specialist, or a comparable qualification.
- Strong knowledge of Python and experience working with GitLab CI.
- Additional experience in C++ and shell scripting (POSIX, Bash) is a plus.
- A solid understanding of Linux containers and container-based technologies such as Docker.
- Good knowledge of the following technologies: JavaScript, HTML5, CSS, and Django.
- The ability to prioritize and structure user requirements and translate user feedback into meaningful improvements for interfaces.
- Confidence working in an international environment, with very good English skills and the willingness to actively use them.

What do we offer you?

- An attractive salary package is given. Additionally, you will benefit from various allowances, such as a company pension plan, business bike, or a subsidy for your job ticket.
- 30 days of vacation and up to five additional days off through flexible working hours.
- Whether you're an early bird or a night owl – thanks to flexible working models (flextime), you can design your workday to suit you.
- With us, you can expect a diverse and challenging range of tasks in an international project environment.
- Family time is especially important to us, and we live that every day: In addition to our family-friendly working hours, we cover the childcare costs for your child/children – whether it's a kindergarten, daycare, or family care.
- We offer you a workplace with a feel-good factor: bright, modern spaces, innovative tools, ergonomic equipment, drinks and snacks, free parking, and plenty of room for initiative and personal development – all of this is important to us so that you feel completely comfortable!
- Direct access to management and supervisors, open communication, a valued team atmosphere, and a relaxed dress code are just as important to us as a lived "you" culture.

Perfect Match?

We want to make it easy for you!

Our recruiting expert Bianca Just looks forward to receiving your resume (max. 5 MB) with your salary expectations and desired start date via email at job@indurad.com or through direct application via our application form.
