

## Mechatronics Development Engineer (m/f/d)

### Our Passion - Be a part of it!

Originally emerging from a research project, indurad has been developing innovative sensor solutions for the global leading raw materials industry since 2008. From our headquarters in Aachen, our team of 150 fantastic employees ensures that our high-quality solutions lead to more safety and reduced greenhouse emissions in the bulk and raw materials industry around the world.

indurad combines the dynamics of a start-up with the energy and ideas of a large corporation – that's what makes us unique! We are a diverse team of talented, innovation-driven individuals focused on making a positive impact on a large scale.

### But there's still something missing – and that's you!

We are looking for a **Mechatronics Development Engineer (m/f/d)** to join our product development team at our headquarters in Aachen as soon as possible.

### What can you expect?

- You design and develop electromechanical components and assemblies for our innovative products – including 3D models and technical drawings.
- You perform engineering calculations and conduct tolerance and collision analyses.
- You are responsible for technical documentation and ensure that all product data in our ERP system is kept up to date.
- You support projects throughout the entire development lifecycle, from concept phase to series production, working closely with R&D, prototyping, production, procurement, quality assurance, and documentation teams.
- You also contribute to the selection of suitable materials, manufacturing processes, and components to continuously improve our products.

### What should you bring?

- A degree in Mechanical Engineering, Mechatronics, or a comparable technical field.
- Several years of experience in mechanical design, along with solid knowledge of manufacturing processes (e.g. machining, sheet metal processing, injection molding, 3D printing).
- Proficiency in common CAD systems and initial experience with PDM systems (e.g. Autodesk Inventor/Vault).
- A strong understanding of engineering standards, tolerances, and design guidelines.
- A structured and independent working style, combined with strong teamwork and communication skills.
- You are comfortable working in an international environment and have very good German and English language skills.

### What do we offer you?

- An attractive salary package is a given. Additionally, you will benefit from various allowances, such as a company pension plan, business bike, or a subsidy for your job ticket.
- 30 days of vacation and up to five additional days off through flexible working hours.

- Whether you're an early bird or a night owl – thanks to flexible working models (flextime), you can design your workday to suit you.
- With us, you can expect a diverse and challenging range of tasks in an international project environment.
- Family time is especially important to us, and we live that every day: In addition to our family-friendly working hours, we cover the childcare costs for your child/children – whether it's a kindergarten, daycare, or family care.
- We offer you a workplace with a feel-good factor: bright, modern spaces, innovative tools, ergonomic equipment, drinks and snacks, free parking, and plenty of room for initiative and personal development – all of this is important to us so that you feel completely comfortable!
- Direct access to management and supervisors, open communication, a valued team atmosphere, and a relaxed dress code are just as important to us as a lived "you" culture.

## Perfect Match?

We want to make it easy for you!

Our recruiting expert Bianca Just looks forward to receiving your resume (max. 5 MB) with your salary expectations and desired start date via email at [job@indurad.com](mailto:job@indurad.com) or through direct application via our application form.
