

IT Infrastructure Specialist: Servers & Networks (m/f/d)

Our Passion - Be a part of it!

Originally emerging from a research project, indurad has been developing innovative sensor solutions for the global leading raw materials industry since 2008. From our headquarters in Aachen, our team of 150 fantastic employees ensures that our high-quality solutions lead to more safety and reduced greenhouse emissions in the bulk and raw materials industry around the world.

indurad combines the dynamics of a start-up with the energy and ideas of a large corporation – that's what makes us unique! We are a diverse team of talented, innovation-driven individuals focused on making a positive impact on a large scale.

But there's still something missing – and that's you!

We are looking for a **IT Infrastructure Specialist: Servers & Networks (m/f/d)** to join our IT team at our headquarters in Aachen as soon as possible.

What can you expect?

- You will be independently responsible for the management and ongoing development of the hardware-related IT infrastructure (servers, routers, switches, etc.) at our sites in Aachen. In doing so, you will ensure the availability, performance and reliability of our systems.
- Your responsibilities will include the planning, installation and lifecycle management of server and network hardware, including replacing hardware or coordinating repairs with our service providers (ISPs, air-conditioning technicians, electricians, hardware suppliers, etc.)
- Another key focus of your role is the maintenance and further development of our storage landscape, using technologies such as Ceph and RAID, amongst others.
- You will also ensure the stable and secure operation of our network environment across both LAN and WAN.
- You will analyse and resolve faults in the IT infrastructure, particularly in the areas of networking, hardware and core services. In doing so, you will work closely with other IT departments and ensure that systems and processes are carefully documented.
- Furthermore, you will administer and optimise our Proxmox virtualisation environment.

What should you bring?

- You work independently, in a structured and responsible manner, and are a genuine team player with good communication skills.
- You have completed vocational training, e.g. as an IT specialist, or a degree in computer science or a comparable qualification – alternatively, you are a career changer with relevant practical experience.
- You have in-depth knowledge of planning, operating and administering server and network hardware as well as data centre infrastructure, and possess excellent knowledge of storage, RAID concepts and virtualisation environments (ideally Proxmox)
- You are well-versed in network technologies (routing, switching, VLANs, firewalls and VPNs) and have already gained practical experience with dynamic routing protocols, particularly OSPF.
- You feel comfortable working in an international environment and have very good German and good English skills.

What do we offer you?

- For this position, we offer an annual salary of between €65,000 and €75,000 gross, depending on experience and qualifications. Additionally, you will benefit from various allowances, such as a company pension plan, business bike, or a subsidy for your job ticket.
- 30 days of vacation and up to five additional days off through flexible working hours.
- Whether you're an early bird or a night owl – thanks to flexible working models (flexitime) and the option for homeoffice, you can design your workday to suit you.
- With us, you can expect a diverse and challenging range of tasks in an international project environment.
- Family time is especially important to us, and we live that every day: In addition to our family-friendly working hours, we cover the childcare costs for your child/children – whether it's a kindergarten, daycare, or family care.
- We offer you a workplace with a feel-good factor: bright, modern spaces, innovative tools, ergonomic equipment, drinks and snacks, free parking, and plenty of room for initiative and personal development – all of this is important to us so that you feel completely comfortable!
- Direct access to management and supervisors, open communication, a valued team atmosphere, and a relaxed dress code are just as important to us as a lived "you" culture.

Perfect Match?

We want to make it easy for you!

Our recruiting expert Bianca Just looks forward to receiving your resume (max. 5 MB) with your salary expectations and desired start date via email at job@indurad.com or through direct application via our application form.
